PROJECT UPDATES

Discover the latest updates from the GreenVET4U project as we approach the final phase of the project development.

Project partners prepare the final event in Uganda

As GreenVET4U enters its final phase, project partners are preparing the **final event, which will take place on 5 November at Makerere University Business School (MUBS) in Kampala, Uganda**. Further details will be published soon on the project website and social media channels.

The event will be an important opportunity to engage new stakeholders and support the long-term sustainability of GreenVET4U. Preparations are therefore well underway.

In parallel, partners are working to finalise and validate all project results. Regular follow-up meetings are taking place both among the Ugandan partners and across the entire consortium to coordinate the remaining tasks and ensure everything is ready for the project's conclusion.

GreenVET4U testing phase puts innovative training solutions into practice

GreenVET4U has put its innovative training approaches and digital tools to the test in Uganda. The testing phase focused on two key green job areas: eco-tourism, led by Great Lakes Safaris (GLS), and waste management, led by Makerere University Business School (MUBS).

The pilots explored how innovative curricula, work-based learning approaches and digital tools can be applied in real training contexts. Feedback gathered during the process will help shape the project's final guidelines for designing and delivering innovative curricula for green jobs in Uganda.

Virtual Innovation Lab: Developing new ideas for green skills and sustainable jobs in Uganda

The GreenVET4U Virtual Innovation Lab brings together VET professionals, businesses, trainers, experts and other stakeholders to develop ideas that connect green skills, entrepreneurship and sustainable development in Uganda.

Nine project ideas are currently being explored, covering areas such as renewable energy, sustainable tourism, climate-smart agriculture for women farmers and green entrepreneurship. The Community of Practice welcomes new contributors who can share their experience and help refine these ideas into potential initiatives.

Interested in contributing or exploring opportunities for collaboration? Join the GreenVET4U Community of Practice and help shape new approaches to green skills and sustainable jobs in Uganda.

PROJECT RESULTS

Explore the GreenVET4U e-learning platform

GreenVET4U has developed an e-learning platform to support VET professionals and in-company trainers in Uganda in designing and delivering innovative curricula for green jobs. It offers a practical guide to digital competencies, a structured Lessons Plan and online courses covering six key competence areas, from green entrepreneurship and digital learning to inclusion and quality assurance.

Explore the available resources and strengthen your skills to support innovative vocational education and training for a greener future in Uganda.

Access the e-learning platform

Competence Assessment WebApp: Validating skills for green jobs

GreenVET4U has developed a Competence Assessment WebApp to support the assessment and micro-credentials-based validation of skills for green jobs in Uganda. The tool helps trainers assess competences and support the recognition and validation of skills acquired through vocational education and training.

Explore the platform and discover how it can support competence assessment and micro-credentials-based validation in green skills development.
